

ACCESS TO SCHOOLS

(2019/20 Report)

#FixPublicSchools
November, 2020.

About Eduplana

Eduplana as a civic tech organization works to increase access to quality education for every citizen in Nigeria using technology.

Through citizen sensitization and media engagement, we promote accountability and service delivery in Nigeria's Education sector. Our mission is to ensure every child no matter their background enjoy equal access to quality education across the 36 states in Nigeria.

By deepening accountability in the education sector, we ensure that government funding and policy works in the education sector. Eduplana through the Needs Counter initiative now works to ensure faster access to education needs for abandoned public schools.

With presence in 21 states and spotlighting more than 57 schools, we believe this will reduce the number of out of school children in Nigeria.

In order to increase access to education, Eduplana works with government education agencies, media and civil society organizations as well as the state ministry of education, state universal basic education boards to ensure the renovation of public schools to stimulate children learning in rural communities.

School Needs Monitoring Team

Lead: Oriyomi Ogunwale

Technology: Babatunde Adegbite

Research: Israel Oke, Akinsola Kehinde, Abdullahi Ningi, Chima Ajaude, Williams

List of Dilapidated schools

Background

Education is the cornerstone of national development, it is a platform that increases social mobility and lifts people out of poverty. The 10.3 million out of school children in Nigeria (the highest number in the world) is as a result of dysfunction in Nigeria's Education sector.

According to the National Bureau of Statistics (NBS) in 2020, unemployment and under-employment is now 27.1% and 28.6% respectively. In order to increase access to education and ensure children are learning again, we must ensure that the school facility is conducive to stimulate children learning.

For children in rural communities, there's a need to ensure school facilities are not abandoned or dilapidated. According to the United Nations sustainable development goal (SDG4a), model schools should have 12 facilities like fence, basic water facilities, internet, computers etc.

In order to ensure access to quality education for the marginalized, we must continue to ensure that public schools especially those in rural communities have the necessary facilities according to the United Nations and ensure they inspire learning among school age children.

INTRODUCTION

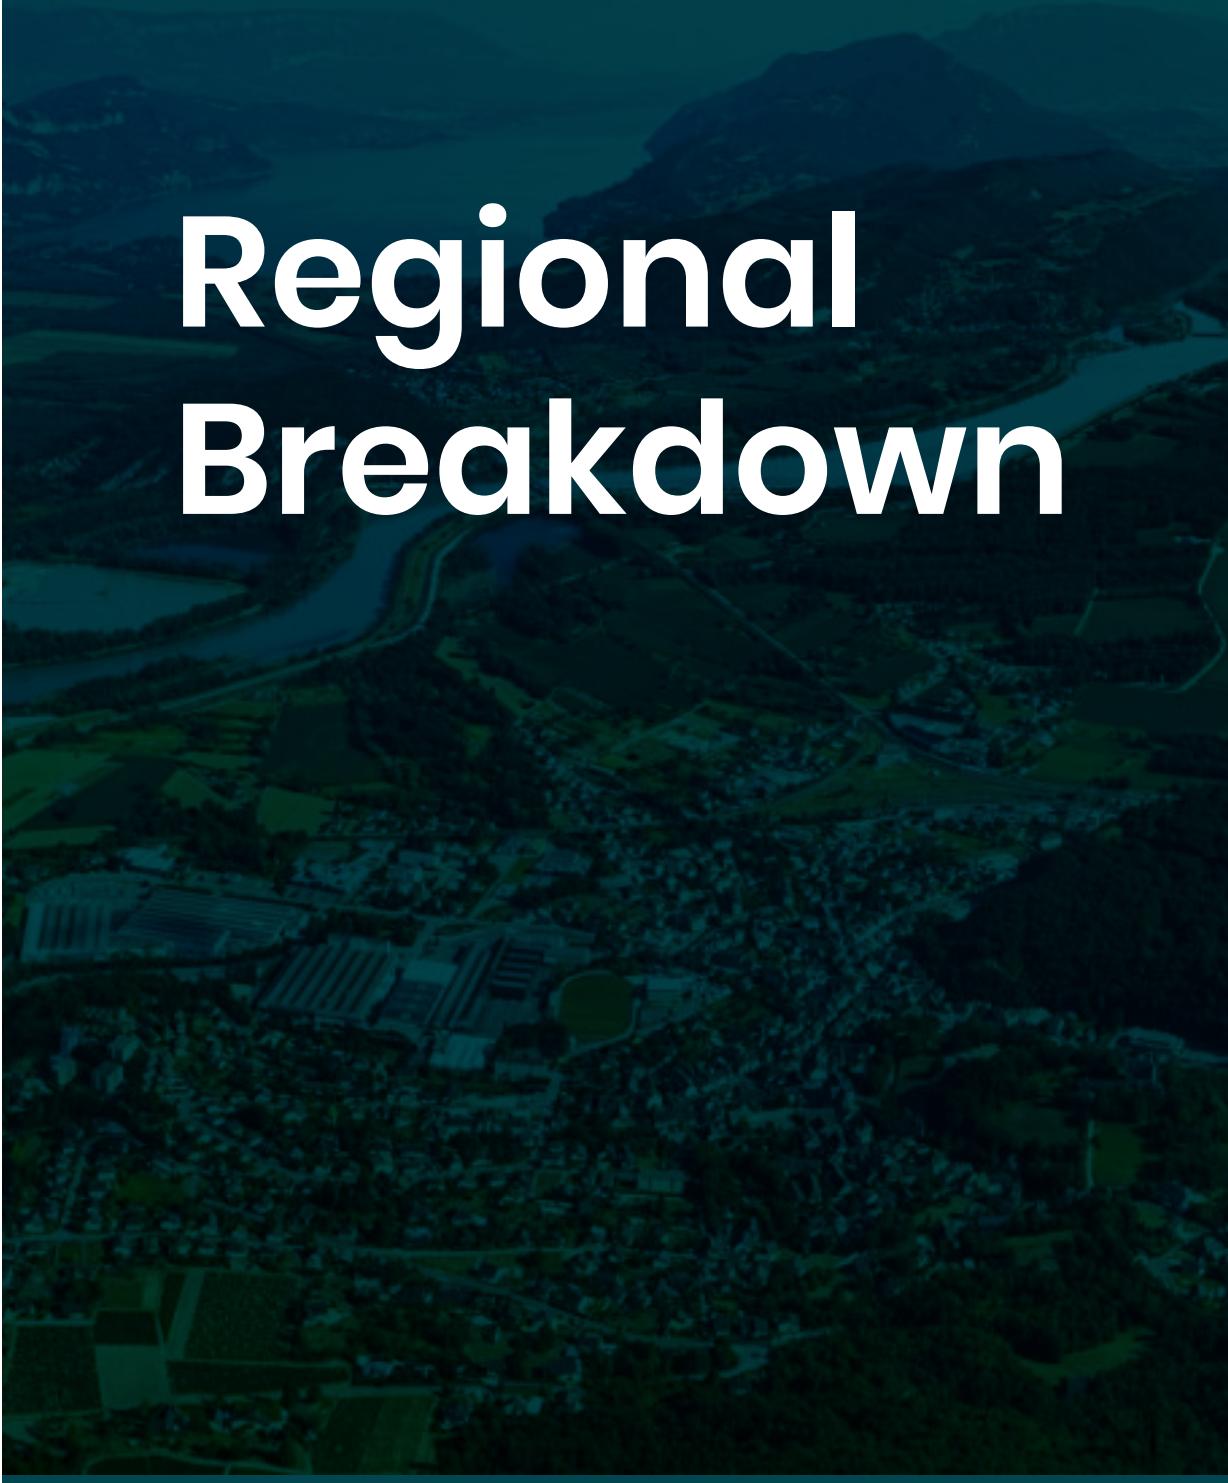

Education is the cornerstone of human, economic and national development, the continuous neglect of the education sector has continued to hamper social mobility in Nigeria. Due to the continuous under-funding of the Education sector in Nigeria by government officials both at Federal and state level, there's a need to start aggregating education needs across the 36 states of Nigeria.

The Sustainable Development Goal 4, target 4.a aims to build and upgrade education facilities that are child, disability and gender sensitive and provide safe, non-violent, inclusive and effective learning environment for all. This target addresses the need for adequate physical infrastructure and safe, inclusive environments that nurture learning for all, regardless of background or disability status.

In order to increase access to Education for every child in Nigeria, state governments must prioritize the renovation of public schools especially in rural communities. While state governors embarked on public schools renovation drive in 2020, more needs to be done in ensuring public schools in Nigeria meet the United Nation standards.

This project is aimed to ensure public schools become a conducive learning environment that stimulate children learning, state government officials must begin to ensure that they prioritize WASH facilities, electricity, internet, library, basic drinking water, computers, toilet, fence etc.

This project further enables us to achieve our mission to increase access to quality education for the marginalized.

An aerial photograph showing a coastal town nestled between green fields and a range of mountains. A river or canal winds its way through the landscape. The town appears to be a mix of residential and industrial buildings.
